AUR31114 - Certificate III Heavy Commercial Vehicle Mechanical Technology

Heavy Vehicle Mechanics will primarily overhaul, service and repair the mechanical parts of road transport vehicles such as the engine, transmission (clutch, gear box and differential) and the suspension systems (springs, steering, brakes, wheels and tyres).

They will perform tasks including fault discovery and diagnosis procedures. They will repair and service cooling systems, diesel fuel systems, air conditioning, engine forced induction systems and clutch assemblies. They will also overhaul, repair and service engines, transmissions, air braking systems and final drive assemblies, and repair and service steering and suspension systems. Repair of ignition, electronic engine management and electrical systems and safety/roadworthy inspections are also encompassed.

In most cases the Queensland Government meets the cost of training. This means that neither the employer nor the trainee pay for the training component of the Traineeship. However, there is Government requirement for all learners to pay a minimal contribution fee determined by the Government.

Course Length

The nominal duration to complete this competency based apprenticeship is 4 years full time. This duration is proportionately increased for part-time and school-based arrangements. The MTA Institute’s flexible training model takes into account the learner’s skills and knowledge acquired through previous training and experience. This may lead to a reduction in the time required to complete this apprenticeship.

Incentives

An employer of an apprentice may be eligible for Commonwealth incentives. For further information contact Australian Apprenticeship Pathways on 1800 338 022 or go to their website www.aapathways.com.au

Enrol

For further information contact one of our friendly team members using the contact details below.

Course Commencement

Commencement usually occurs within 28 days of enrolment.
