AUR32512 - Certificate III
Automotive Underbody Technology

An Underbody Technician carries out vehicle servicing, fault diagnosing and the repair of braking, steering and suspension systems, and the inspection, service and repair of passenger light vehicle and 4WD tyres, rims and associated components.

Fees and Charges
In most cases the Queensland Government meets the cost of training. This means that neither the employer nor the apprentice pay for the training component of the apprenticeship. However, there is Government requirement for all learners to pay a minimal contribution fee determined by the Government.

Course Length
The nominal duration to complete this competency based apprenticeship is 4 years full time. This duration is proportionately increased for part-time and school-based arrangements. The MTA Institute’s flexible training model takes into account the learner’s skills and knowledge acquired through previous training and experience. This may lead to a reduction in the time required to complete this apprenticeship.

Incentives
An employer of an apprentice may be eligible for Commonwealth incentives. For further information contact Australian Apprenticeship Pathways on 1800 338 022 or go to their website www.aapathways.com.au

Enrol
For further information contact one of our friendly team members using the contact details below.

Course Commencement
Commencement usually occurs within 28 days of enrolment.
